ROLLS-ROYCE MOTOR CARS DUBAI

Dr. Cagatay Sergin

You Deserve a Masterpiece by a Master - Dr. Sezgin

When one selects a Rolls-Royce, it is never by chance. It is a decision defined by discernment, exclusivity, and the quiet confidence of knowing that only the very best will do. The same philosophy should guide the choice of a hair transplant surgeon.

Hair restoration is not a matter of vanity - it is a matter of identity, confidence, and elegance. For individuals whose lives are defined by excellence, reputation, and presence, only a master can craft the kind of result that lives up to their name.

Dr. Cagatay Sezgin is that master.

Based full-time in Dubai, Dr. Sezgin is globally renowned for delivering the highest level of artistry and precision in hair transplantation. Much like a Rolls-Royce, his practice is never about mass production. He operates on just one patient per day - ensuring each procedure is bespoke, undivided, and meticulously performed to perfection.

Hair transplantation is a once-in-a-lifetime procedure. There are no second chances. The result must be natural, flawless, and enduring - on the very first attempt.

That level of excellence demands more than just medical knowledge. It requires an artistic eye, an instinct for aesthetics, and decades of mastery. Dr. Sezgin is the first Turkish board-certified surgeon to become a member of the prestigious International Society of Hair Restoration Surgery (ISHRS) and has been recognized as a Fellow Member - one of the highest honors in the field. A member since 2001, he has dedicated his entire career since 2000 exclusively to hair restoration. His clientele includes global royalty, Forbes-listed entrepreneurs, Fortune 500 CEOs, and prominent public figures - each placing their trust in his unmatched skill and discretion.

Dr. Sezgin offers a full suite of treatments tailored for the refined individual: hair, beard, and eyebrow transplantation, female hairline lowering, and advanced therapies for hair loss including stem cell stimulation, exosomes, growth factor treatments, low-level laser therapy, and genetic testing.

Just as Rolls-Royce represents the pinnacle of engineering and design, Dr. Sezgin represents the pinnacle of hair restoration. The question is not just who performs the procedure - it is who should.

For those who live by the highest standards, the answer is clear.

Hortman clinics, 32 Burj Al Salam SZR.

Dr. Cagatay SEZGIN, Fellow ISHRS.
A masterpiece, by a master.
